LoüTeq® DATA™ - Data Center Solutions
Hybrid Steel Connectors | SEB (Structural Engineered
Bamboo) Structural Frame System:

DATA
solutions

Highest Performance

SEB is over twice the strength of any engineered Timber Product with an MOE of over 4,000 Ksi (27,579 Mpa), and is manufactured in the United States. It's proprietary slat materials are sourced from the strongest bamboo species in the world. Guadua is locally sourced from South America. Ecuador | Columbia.

SEB is manufactured into Structural Components and Lam-Stock for performance structural GluLam and component applications.

Hybrid Solution

Structural Engineered Bamboo +
Cold Formed Steel

The full solution is fully kitted and ready for assembly from a flat pack and speed installation on site. The result is a higher performance and more robust frame.

LoüTeq Data Center Solutions:

- Kitted Modular Structures - Fabrication
- Renewable Technologies Integration
- HAC-Wall Modular Kitted Structures
- Hot Aisle Containment - Solutions
- Server Racking | Cabinets
- Design Build Solutions - Shop Drawings
- Design Assist - Data Center Engineers
- Sustainable and Net Zero Solutions
- Public/Private Partnerships for Governments
